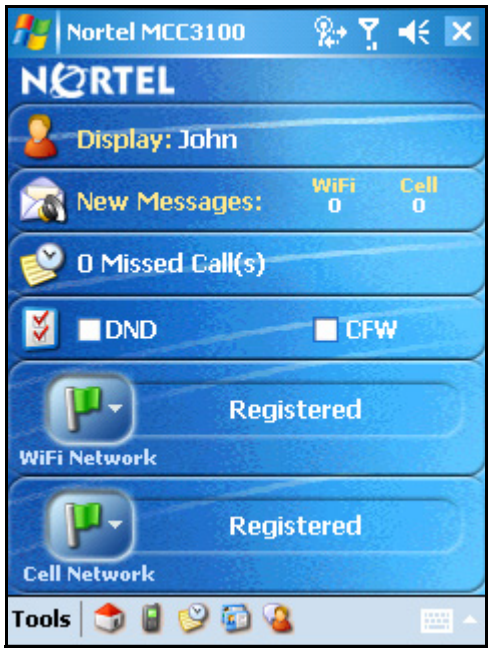
Getting started with the MCC 3100 with VPN for Windows Mobile



The MCC 3100 with VPN for Windows Mobile provides multimedia capabilities on a mobile device. You can place both cellular and WiFi calls.

Users are advised to select/use headsets which are designed to reduce excessive sound pressure levels or acoustical shocks. Users should check that their headsets do meet their respective National or International Acoustical and Safety requirements.

Starting MCC 3100 with VPN for Windows Mobile

To open the MCC 3100 with VPN for Windows Mobile window,

1. Tap **Start > Programs**.
2. Tap the **Nortel MCC3100** icon.

   The MCC 3100 with VPN for Windows Mobile screen appears, as shown in the figure above.
3. Use Automated Setup or Manual Setup to enter your configuration settings.

For further information starting the MCC 3100 for Windows Mobile, see *Nortel Mobile Client 3100 for Windows Mobile User Guide* (NN43020-100).

Installing the MCC 3100 for Windows Mobile

Your system administrator sends details on the following instructions in an email:

1. Download and install the MCC 3100 for Windows Mobile software.
2. Install your license key.

Start the MCC 3100 for Windows Mobile application.

Your license key validates and your configuration settings download.

The MCC 3100 for Windows Mobile is ready to place calls and receive messages.

Selecting a network roaming mode

To enable automatic roaming mode:

1. Select **Tools** > **Automatic Roaming**.

The MCC 3100 for Windows Mobile automatically logs on to the available networks and selects a dialout net work for outgoing calls and messages, either WiFi or cellular.

To enable manual roaming mode:

1. Select **Tools** > **Manual Roaming**.

You can manually log on to the available networks and select a dialout network for outgoing calls and mes sages, either WiFi (default) or cellular.

Enabling the power management features

To enable the power management features:

1. On your mobile device, select **Start** > **Settings** > **System**.
2. Tap **Power**.
3. Tap **Advanced**.
4. Select the **On battery power**: **turn off device if not used for** check box.
5. Select a timeout period.
6. Tap **OK**.
7. On the MCC 3100 for Windows Mobile, select **Tools** > **Settings** > **Advanced**.
8. Select **Enable WiFi Standby**.

   The mobile device enters standby mode when you press the power button or when the activity timer expires. You can still receive calls and messages while your device is in standby mode.

Enabling the automatic screen lock

To enable the automatic screen lock:

1. Select **Tools** > **Settings** > **Advanced**.
2. To lock the screen, section **On Calls** for the Lock Screen field.
3. Tap **OK**.

The screen lock turns off when you are in a call. To turn the screen lock off, tap and hold the lock button.

Enabling VPN

To enable VPN:

1. Select Tools > VPN.
2. Select the **Enable VPN** check box.

   You are prompted to set up a VPN tunnel whenever you log on the WiFi network (manually or automatically)

Log on to a network

To log on to a network (manual roaming mode only):

1. Tap the **Home** icon.

2. Tap a network button:
   - **WiFi**
   - **Cellular Network**

3. Set up a VPN tunnel, if prompted (WiFi only):
   a. Tap **Yes**.
   b. Select a VPN profile, then tap **Connect**.
   c. Enter your ID and password, then tap **OK**.
4. Select **Login**.

If the MCC 3100 for Windows Mobile operates in Automatic roaming mode, you log on the networks automatically when they are available.

Placing a call

Use one of the following options to place a call:

Option 1:

1. Tap the **Call Dialpad** icon.

2. Select a dialout network (manual roaming mode only)
   - **WiFi**
   - **Cell**
